A GROWING CHALLENGE

The global population, currently at 7.3 billion, will grow in the coming decades to 9 billion and perhaps 11 billion by the end of the 21st century. Some 80% of this growing population will live in cities, most of which are yet to be built. Of this projected 9 billion people, 3 billion will belong to the middle class, with sufficient disposable income to purchase the consumer goods that others enjoy elsewhere in the world,

United Nations Environment Programme, 2015

Figure 3.2 Waste generation versus income level by country

The logo features the word "LEACH" in a bold, white, sans-serif font. The letter "L" is significantly larger than the others and is positioned on the left side of a blue horizontal bar. The letters "EACH" are smaller and follow the "L". The blue bar has a red diagonal stripe on its left side and a red horizontal stripe at its bottom. The background is a green gradient with white circuit-like lines and circles in the corners.
